

## AusZeit - vacation home with care Concept

### Presentation abstract

“AusZeit”- vacation home with care concept

Where the cuckoo is at home and the mountain air smells of fir trees, is the most beautiful environment to regain strength and recharge your batteries.

We are specialized in providing relatives and those in need of care with a joint, relaxing holiday by ensuring individual nursing and medical care.

First of all, the holiday is discussed with the interested parties and planned individually to the smallest detail. Here are two competent contacts available. On the one hand the "Ferienland im Schwarzwald GmbH" and on the other the "Evangelische Altenhilfe St. Georgen gGmbH".

Our guests spend together an intimate and carefree holiday in our apartments in the beautiful Black Forest, which attracts with leisure activities in every season.

The peculiarity of “AusZeit” is that our apartments are embedded in a first-class outpatient and inpatient care infrastructure with highly qualified staff. This gives our guests exactly the same care as they would receive at home. And like the same process as at home, care can always be adjusted to unforeseen changes.

The "AusZeit" team consists of three staff members of the “Evangelische Altenhilfe St. Georgen gGmbH” and we are mainly supported by two employees of the Tourist Information (“Ferienland im Schwarzwald GmbH) in St. Georgen. The team “AusZeit” can be found in person at any time during the day at the office. For questions, concerns and problems outside office hours our holiday guests can reach us anytime by phone. The employees are well-trained in the areas of communication, dementia or caregivers and health care professionals (Bachelor of Arts).

The five apartments have been conceptually designed so that all rooms are accessible and handicapped accessible. The apartments are located in a residential area, which is within walking distance of the city center. Each flat has a modern designed nursing bed, creating a sense of security and to feel comfortable.

Sankt Georgen in the Black Forest is located in the center of many culturally valuable cities, which are all easily accessible by train or bus. The station is 1.5 km away from the residential area and can be easily reached by bus or taxi. It is also possible to arrange an individual travel service via the Auszeit team. They can also transport people in wheelchairs, for example.

In consultation with “Ferienland im Schwarzwald GmbH”, the holiday and leisure facilities are also individually discussed in advance and planned, but can be adapted on-site at any time. Again, all employees of both teams are available at all times. We constantly strive to improve our offer and adapt it to the needs of our guests and prospected persons. Therefore, the holidays of each guest are intensively evaluated.

All information can be found in our flyer or on our homepage ([www.auszeit-fewos.de](http://www.auszeit-fewos.de)) and the homepage of the “Ferienland im Schwarzwald GmbH” ([www.dasferienland.de](http://www.dasferienland.de)). Furthermore, all major booking portals, as well as other facilities and umbrella organizations, which are specialized in the field of care, promote our new offer.
