

World Summit on Accessible Tourism

# Destinations for All

Brussels 1-2 October 2018

## Accessible Tourism in Brussels

Miguel Gerez (AMT Concept - Belgium)

André Moons (AMT Concept - Belgium)

# AMT Concept

AMT Concept is a non-profit association in the Brussels Capital Region whose objective is to develop any action aimed at improving the accessibility of public spaces, transport and the built environment.

# BRUSSELS FOR ALL

TOURIST GUIDE BOOK  
FOR THE TRAVELLERS  
WITH REDUCED MOBILITY

[Handy.Brussels](http://Handy.Brussels)

Accessible tourism is a  
leading part of AMT Concept's  
objectives.

# The guide «Brussels for All»

- contributes to the development of the «tourism for all» since 2003 in a paper form,
- since 2005 as a website,
- since 2018 as a web App and is now renamed :

Editeur responsable : Miguel GEREZ, Administrateur-délégué, AMT Concept asbl : 5/4 rue Auguste Renoir, 1140 Evere.

Any reproduction, even partial, of any part from this guide, by any means is prohibited without written permission of AMT Concept asbl.

**Free, can't be sold.**

The paper edition is a resource guide that is complemented by the WebApp. It offers simple and concise information regarding accessibility.

More useful details and photos are available on the site with specific comments about each place visited by the team of AMT Concept.

AMT Concept provides recommendations to reduce behavioral barriers as well as architectural ones which inhibit disabled tourists to travel in full safety.

For any kind of travel, people need exhaustive information on the state of the infrastructure.

A step, a badly calculated door width, a wrongly placed plant can be sources of dependence and weariness for disabled travelers or their travelling assistants.

The guide «Brussels for All» has been since 2003 a precious help for all persons who visit Brussels and for those who, for different reasons, are temporarily or permanently reduced in their mobility, including also the visually and hearing impaired or the ones reduced in mobility due to certain factors as pregnancy, aged persons, etc ....

This broad vision of the person with reduced mobility integrates the reality of millions of people, faced with obstacles of mobility. Just think of the growth of number senior tourists.

HANDY.BRUSSELS

**FROM PAPER TO WEB, AN WEB TO WEB APP**

The website is consulted more frequently from mobile units, phones and tablets.

AMT Concept developed a more fluid and adaptable webApp that allow to take advantage of geolocation functions from phones and tablets.

So that the tourist with reduced mobility can consult the guide on his mobile unit *in situ*, in the field. He will hold in his hand a wealth of useful information for his stay in Brussels.

Our team wishes that our experience for «Brussels for All» can inspire all, their family and their travelling assistants to have a wonderful stay in Brussels thanks to this handy tool :
